| Appendix X – Clinical Visit Documentation Criteria | 24 |

DISCLAIMER

Content of this manual is subject to change at the discretion of the Program Director, Clinical Coordinator and Faculty. Should changes be required, they will not be made capriciously, but for valid and necessary reasons.

Navigation Instructions

This clinical manual is a unified hyperlinked document which is navigable via the interactive table of contents. All hyperlinked appendices are bolded throughout the manual and listed in sequential order on the last page. The appendices are inserted in sequential order at the end of the manual. To view an appendix document while reading the manual, click on the **bolded appendix name**. This will take you to the appropriate page to view the document.

Click Alt + \blacktriangleleft (left arrow) to return to a previous page.

Introduction

Purpose

The purpose of this manual is to provide a comprehensive overview of clinical education expectations and evaluation methods. The information in this document shall serve as a guide for students, faculty and preceptors **in addition to the program policy manual and clinical course syllabi.**

Clinical Officials

Program Clinical Coordinator

The program Clinical Coordinator manages all aspects of clinical education, including correlation with didactic education, clinical rotation scheduling, clinical instruction, evaluation, assessment and advisement. The Clinical Coordinator works closely with the Program Director, College Clinical Faculty and Clinical Preceptors to ensure effective clinical education practices.

College Clinical Faculty

College Clinical Faculty is responsible for clinical instruction and evaluation of the students. Scheduled faculty visits occur each semester at each clinical affiliate. Clinical Faculty is an integral part of student evaluation and assessment and ensures program polices are adhered to in the clinical education setting.

Clinical Preceptors

Each clinical affiliate has one or more JRCERT recognized Clinical Preceptors. These individuals provide students with instruction, supervision and evaluation in the clinical education setting. The Clinical Preceptors work closely with the staff technologists to support the program policies, procedures and student progress.

Student Levels

Level I Student

Level I students are in the first year of the Program. Students begin by first observing and assisting with patient care activities and imaging procedures in the clinical setting, and then move to a more active role as they complete initial competencies learned in the classroom and laboratory setting. During year one of the program, students need to be directly supervised the majority of the time.

Level I student clinical courses include the following: Fall Year I - Clinical Education I (DMI 196) Spring Year I - Clinical Education II (DMI 197) Early Summer Year I - Clinical Education III (DMI 198)

Level II Student

Level II students are in the second year of the Program. Students receive classroom and laboratory instruction for the remaining patient care activities and imaging procedures. Students work more independently and continue to refine skills previously demonstrated. Student confidence and competence increases and indirect supervision is generally required.

Level II student clinical courses include the following: Late Summer Year II – Clinical Education IV (DMI 199) Fall Year II - Clinical Education V (DMI 297) Spring Year II - Clinical Education VI (DMI 298) Early Summer Year II - Clinical Education VII (DMI 299)

Clinical Assignments

Upon Program commencement, students are assigned to one of the following **primary** clinical affiliates:

Bryn Mawr Hospital 130 S. Bryn Mawr Avenue Bryn Mawr, PA 19010

Corporal Michael J. Crescenz VAMC 3900 Woodland Avenue Philadelphia, PA 19104

Jefferson Torresdale Hospital 10800 Knights Road Philadelphia, PA 19114

Lankenau Medical Center 100. E. Lancaster Avenue Wynnewood, PA 19096

Methodist Hospital 2301 S. Broad Street Philadelphia, PA 19145

Paoli Hospital 255 W. Lancaster Avenue Paoli, PA 19301

Penn Presbyterian Medical Center 51 N. 39th Street Philadelphia, PA 19104

Pennsylvania Hospital 800 Spruce Street Philadelphia, PA 19107

Riddle Hospital 1068 W. Baltimore Pike Media, PA 19063

Scheduled clinical hours will be between 7:00 a.m. and 5:00 p.m. Hours may vary per clinical rotations to ensure appropriate staff supervision. Students will be provided with a detailed schedule prior to the start of each semester. Students will be in clinical no more than eight hours per day and will have a **one-hour lunch break** between the hours of 11:00 a.m. and 1:00 p.m.

Students may be assigned to an alternate clinical affiliate in the event a rotation is not offered. This will ensure equal opportunities to all students and the completion of clinical competency requirements.

The following sites serve as **secondary** clinical affiliates:

The Children's Hospital of Philadelphia

34th Street and Civic Center Boulevard Philadelphia, PA 19104 *Pediatric/level I trauma rotation for all students*

Concentra Urgent Care

2010 Levick Street Philadelphia, PA 19149 Urgent care rotation for all students

Jefferson Frankford Hospital

4900 Frankford Avenue Philadelphia, PA 19124 *Jefferson Torresdale Hospital rotation; separate recognition due to proximity*

Main Line Health Broomall

1991 Sproul Road Broomall, PA, 19008 Urgent care rotation for all students

Penn Medicine Rittenhouse (Tuttleman)

1840 South Street Philadelphia, PA 19146 Pennsylvania Hospital rotation; separate recognition due to proximity

Parking and public transportation is available for all clinical affiliates.

The DMI Program seeks to provide students with valuable clinical education experiences. The addition or removal of clinical education settings may occur at the discretion of program officials.

Orientation to the Clinical Setting

During the first semester of the program (late summer term), students will complete a clinical orientation with program faculty. Additionally, during the College break before the first fall semester, students are required to attend hospital orientation (1.5 days total) at their assigned clinical site. Orientation at any alternate site will take place on the first day of the rotation with an assigned Clinical Preceptor. See Appendix A – New Student Hospital Orientation Guide

Competency Requirements

In accordance with the ARRT's 2021 approved Radiography Didactic and Clinical Competency Requirements, students are required to document compliance with the following:

- 10 Mandatory General Patient Care Procedures
- 36 Mandatory Imaging Procedures
- 15 Elective Imaging Procedures (selected from a list of 34 procedures)
 - 1 elective must be from the head section
 - 2 electives must be from the fluoroscopy studies section

Evaluation Process

Expectations regarding competency requirements for each clinical course will be provided in the course syllabus. The program follows a competency-based curriculum and semester requirements ensure students stay on a successful path to completion. Competency may only be evaluated by the Program Director, Clinical Coordinator, Clinical Faculty or Clinical Preceptors **See Appendix B – Competency Eligibility Timeline**

Simulations

During the final two weeks of the program (DMI 299), select imaging procedures may be simulated with Program Faculty. The Program Director and Clinical Coordinator will determine the appropriateness for such simulations based on clinical affiliate workflow and student schedules. Fluoroscopic, trauma, mobile, surgical and pediatric procedures are ineligible for simulation. See Appendix C – ARRT Radiography Competency Requirements

Scheduling Sequence

Throughout the DMI program, students will complete seven clinical education courses. Primarily, students will be scheduled in clinical rotations which will allow them to obtain the volume and variety of experiences required to be competent in all Radiographic procedure requirements.

In addition to these rotations, students will complete a one-week (3-4 day) introductory rotation through the following advanced imaging modalities: CT, DEXA, Interventional Radiology, Mammography, MRI, Nuclear Medicine, Radiation Therapy and Ultrasound.

Policy regarding the placement of students in Mammography clinical rotations to observe and/or perform breast imaging: All students, male and female, will be offered the opportunity to participate in mammography clinical rotations. The program will make every effort to place a male student in a mammography clinical rotation if requested; however, the program is not in a position to override clinical setting policies that restrict clinical experiences in mammography to female students. Male students are advised that placement in a mammography rotation is not guaranteed and is subject to the availability of a clinical setting that allows males to participate in mammography rotations if clinical settings are not available to provide the same opportunity to male students.

The DMI Program's policy regarding student clinical rotations in mammography is based on the sound rationale presented in a position statement on student mammography clinical rotations adopted by the Board of Directors of the Joint Review Committee on Education in Radiologic Technology (JRCERT) at its April 2016 meeting.

See Appendix D – JRCERT Mammography Position Statement

All students will also complete a three-week pediatric rotation at CHOP prior to program completion. During the final two semesters of the program, students may choose up to two elective rotations in the advanced imaging modality of their choice. Each elective rotation is two-weeks (6-8 days) in length.

The following section includes details for each clinical course, including relevant rotations.

DMI 196 (Clinical Education I) – Fall Year I

During Clinical Education I, students are introduced to the radiology department and hospital environment. Students begin the course by observing department routines and procedures. After classroom and laboratory instruction, students move into a more active role assisting and performing patient care activities and imaging procedures under appropriate supervision. Students will report to clinical on Tuesday and Thursday for 14 weeks. Clinical rotations include general inpatient, general outpatient, emergency room/trauma radiography, fluoroscopy, orthopedic radiography and portable radiography. Each rotation will be two to three weeks (4-6 days) in length.

DMI 197 (Clinical Education II) – Spring Year I

During Clinical Education II, students become more comfortable with the radiology department and hospital environment. Students continue to observe department routines and procedures relevant to classroom and laboratory activities. After classroom and laboratory instruction, students move into a more active role assisting and performing patient care activities and imaging procedures under appropriate supervision. Students will report to clinical on Tuesday and Thursday for 14 weeks. Clinical rotations include general inpatient, general outpatient, emergency room/trauma radiography, fluoroscopy, orthopedic radiography, portable radiography and surgical radiography. Each rotation will be two to three weeks (4-6 days) in length.

DMI 198 (Clinical Education III) – Early Summer Year I

During Clinical Education III, students will gain a more confident persona when performing patient care activities and imaging procedures learned in previous semesters. Students will report to clinical Monday through Thursday for 7 weeks. Clinical rotations include general inpatient, general outpatient, emergency room/trauma radiography, fluoroscopy, orthopedic radiography, portable radiography and surgical radiography. Each rotation will be one to two weeks in length (4-8 days). Additionally, students will begin introductory rotations through the advanced imaging modalities of CT, DEXA, IR, Mammography, MRI, Nuclear Medicine, Radiation Therapy and Ultrasound. Each intro rotation will be one-week in length and students will spend no more than two out of the seven weeks in advanced modalities.

DMI 199 (Clinical Education IV) – Late Summer Year II

During Clinical Education IV, students are considered level II and will begin working more independently under appropriate supervision when performing studies in which they have been deemed competent. Students will continue to refine skills in patient care activities and imaging procedures. Students will report to clinical Monday through Thursday for 7 weeks. Clinical rotations include general inpatient, general outpatient, emergency room/trauma radiography, fluoroscopy, orthopedic radiography, portable radiography and surgical radiography. Each rotation will be one to two weeks in length (4-8 days). Additionally, students will continue introductory rotations through the advanced imaging modalities of CT, DEXA, IR, Mammography, MRI, Nuclear Medicine, Radiation Therapy and Ultrasound. Each intro rotation will be one-week in length and students will spend no more than two out of the seven weeks in advanced modalities.

DMI 297 (Clinical Education V) – Fall Year II

During Clinical Education V, students will continue to work on the completion of clinical competency requirements. Students usually require indirect supervision when performing general diagnostic procedures and patient care activities completed in previous semesters. Students will report to clinical on Monday, Wednesday and Friday for 14 weeks. Clinical rotations include general inpatient, general outpatient, emergency room/trauma radiography, fluoroscopy, orthopedic radiography, portable radiography and surgical radiography. Each rotation will be one to two weeks (3-6 days) in length. Introductory rotations through the advanced imaging modalities of CT, DEXA, IR, Mammography, MRI, Nuclear Medicine, Radiation Therapy and Ultrasound will conclude this semester. Each intro rotation will be one-week in length and students will spend no more than four out of the fourteen weeks in advanced modalities.

DMI 298 (Clinical Education VI) – Spring Year II

During Clinical Education VI, students will continue to work on the completion of clinical competency requirements. Students usually require indirect supervision when performing general diagnostic procedures and patient care activities completed in previous semesters. Students will report to clinical on Monday, Wednesday and Friday for 14 weeks. Clinical rotations include general inpatient, general outpatient, emergency room/trauma radiography, fluoroscopy, orthopedic radiography, portable radiography and surgical radiography. Each rotation will be one to two weeks (3-6 days) in length. Students will also complete a three-week pediatric rotation. Elective rotations through the advanced imaging modalities of Cardiac Cath, CT, DEXA, IR, Mammography, MRI, Nuclear Medicine, Radiation Therapy and Ultrasound will begin this semester. Each elective rotation will be two-weeks in length.

DMI 299 (Clinical Education VII) – Early Summer Year II

Clinical Education VII is the final clinical component of the program. Students demonstrate continued competency and increased proficiency. The majority of procedures are performed under indirect supervision as students refine their entry-level skills. Students will report to clinical Monday through Thursday for 7 weeks. Clinical rotations include general inpatient, general outpatient, emergency room/trauma radiography, fluoroscopy, orthopedic radiography, portable radiography and surgical radiography. Each rotation will be one to two weeks in length (4-8 days). Elective rotations through the advanced imaging modalities of Cardiac Cath, CT, DEXA, IR, Mammography, MRI, Nuclear Medicine, Radiation Therapy and Ultrasound will conclude this semester. Each elective rotation will be two-weeks in length. Completion of all ARRT requirements, exit evaluations and terminal competencies will take place this semester.

Rotation Expectations

General Clinical Expectations

(in accordance with the ASRT Radiography Curriculum)

- 1. Discuss ethics and the characteristics of professional behavior.
- 2. Apply professional communication techniques.
- 3. List the radiography practice standards.
- 4. Demonstrate positive values and a commitment to diversity, equity, and inclusion.
- 5. Explain the elements of procedural performance and radiation protection.
- 6. Recognize the requirements for clinical competency.
- 7. Differentiate the equipment used in various imaging concentrations.
- 8. Discuss the dose differences between imaging and radiation therapy doses.
- 9. Compare and contrast the various methods of image creation.
- 10. Explain the basic indications and contraindications for various imaging concentrations.
- 11. List the educational and certification requirements for different imaging concentrations.
- 12. Discuss the image appearance and principles of operation for equipment used in various imaging concentrations.

Cardiac Catheterization Elective Rotation Expectations

- 1. List pathological conditions that would justify a cardiac angiogram.
- 2. Observe the pre-procedure patient assessment and preparation: patient ID process, history obtainment, review of lab results, pertinent prior studies, and ECG.
- 3. Review the procedure plan and checklist that becomes the patient record.
- 4. Participate in room and tray preparation for procedures.
- 5. Identify supplies used: catheters, guide wires, stents, ablation tools, etc.
- 6. Properly prepare a sterile tray for a procedure.
- 7. Demonstrate an appropriate method for adding additional sterile items to an existing sterile field/tray.
- 8. Demonstrate an appropriate method for dressing in a sterile gown & gloves, head cover, mask, eye shield, and shoe covers.
- 9. Describe, in detail, the Seldinger technique for artery access.
- 10. Demonstrate an appropriate method of protecting oneself from contamination when passing another person while dressed in sterile apparel.
- 11. Identify imaging equipment: C-arm, control panel, imaging rate, digital recording features, and applications.
- 12. Practice appropriate radiation safety.
- 13. Explain the differences between various procedures observed: left heart, right heart, and coronary.
- 14. Distinguish between diagnostic and therapeutic procedures.
- 15. Identify projections used to demonstrate coronary arteries.
- 16. Explain the use of the power injector, contrast media used, and flow rates.
- 17. Observe the post-procedure patient management and follow-up.
- 18. State the reason for applying pressure to the puncture site following catheter removal and minimum amount of time required for pressure to be applied.

Computed Tomography (CT) Rotation Expectations

- 1. Identify the CT equipment: gantry, table, operator's console, contrast injector, etc.
- 2. Observe differences between conventional x-ray and computerized tomography.
- 3. Explain the difference between scan and display function.
- 4. Describe various protocols employed in CT.
- 5. List the pathological conditions or indications which would justify having a CT scan of the head
- 6. List the pathological conditions or indications which would justify having a CT scan of the abdomen and/or pelvis.
- 7. Participate in room preparation prior to the patient's arrival.
- 8. Identify the types of contrast media used in CT.
- 9. Explain which procedures require contrast media.
- 10. Record patient history including allergy history.
- 11. Ask the patient the appropriate questions necessary for contrast media administration.
- 12. Demonstrate the ability to set-up a power injector for contrast media injection.
- 13. Practice venipuncture skills.
- 14. Assist the technologist during contrast injection.
- 15. Describe the importance of breathing techniques used in CT.
- 16. Identify gross anatomy of the head, chest or abdomen on cross-sectional CT scans.
- 17. Explain safety measures and emergency shut-down procedures used in CT.
- 18. Perform enhanced and unenhanced scans with direct supervision of staff technologists.

Dual-Energy X-ray Absorptiometry (DEXA) Rotation Expectations

- 1. Identify the DEXA equipment.
- 2. Set up the room for a scan.
- 3. Understand indications for and the purpose of DEXA scans.
- 4. Explain the DEXA scanning procedure to a patient.
- 5. Describe the differences between osteoporosis and osteopenia.
- 6. List common risk factors for osteoporosis.
- 7. Describe the anatomical areas scanned during DEXA.
- 8. Describe scan contraindications and compensation methods.
- 9. Describe the importance of accurate patient positioning.
- 10. Assure all radiopaque artifacts have been removed from the patient.
- 11. Position a patient for a lumbar spine scan with assistance from the technologist.
- 12. Position a patient for a hip scan with assistance from the technologist.
- 13. Properly set-up the computer for scanning of the patient.
- 14. State the information provided by the DEXA scan.
- 15. Explain the difference between T and Z scores.

Interventional Radiology (IR) Rotation Expectations

- 1. Identify the x-ray equipment & various supplies used in IR (e.g. catheters, guide wires, vessel dilators).
- 2. Participate in room preparation prior to patient arrival, including tray prep.
- 3. Explain and practice sterile technique (gloving, gowning, maintaining sterile tray).
- 4. Demonstrate an appropriate method for adding items to a sterile tray.
- 5. Demonstrate an appropriate method for dressing in sterile attire (gown, gloves, head cover, mask, eye shield, and shoe covers).
- 6. Demonstrate an appropriate method of protecting oneself from contamination when passing another person while dressed in sterile apparel.
- 7. Explain patient preparation for each procedure observed, including informed consent.
- 8. Explain use of the power injector and types of contrast media used.
- 9. Describe various interventional procedures and distinguish between diagnostic and therapeutic procedures.
- 10. Explain the difference among various procedures observed.
- 11. Describe how venous access studies differ from arteriograms.
- 12. List pathological conditions that would justify an angiogram.
- 13. Locate & record a patient's femoral or pedal pulse.
- 14. Describe the importance of assessing extremity skin color and temperature.
- 15. Appropriately shave, scrub, and drape the injection site in a sterile fashion.
- 16. Describe, in detail, the Seldinger technique for artery access.
- 17. Assist physician performing the Seldinger technique.
- 18. Operate the x-ray equipment while giving all appropriate patient instructions.
- 19. Explain the use of the power injector, contrast media used, and flow rates.
- 20. Fill the power injector with the indicated contrast media & set flow rate.
- 21. Observe the post-procedure patient management and follow-up.
- 22. State the reason for applying pressure to the puncture site following catheter removal and minimum amount of time required for pressure to be applied.

Mammography Rotation Expectations

- 1. Identify the major components of Mammography equipment.
- 2. Clean and set-up the exam room prior to each procedure.
- 3. Obtain a patient history and assure completion of appropriate forms.
- 4. Explain the importance of reviewing previous mammograms.
- 5. Explain the differences between screening and diagnostic exams.
- 6. Explain a screening mammogram to a patient.
- 7. Display an empathetic attitude and answer questions in an appropriate manner.
- 8. Observe the technologist perform visual and physical breast inspection.
- 9. Properly manipulate the equipment (rotation, localizers, compression, etc.)
- 10. Observe and assist in the positioning of standard and special projections of the breast (CC, MLO, etc.).
- 11. Describe the purpose of needle localization.
- 12. Describe a stereotactic procedure.
- 13. Provide patients with information on how they will receive their exam results.
- 14. Observe and assist in the performance of quality control procedures.
- 15. Identify basic anatomy on a mammographic image.
- 16. Evaluate images for proper positioning and display of pertinent anatomy.
- 17. Identify obvious pathology on mammographic images.

Magnetic Resonance Imaging (MRI) Rotation Expectations

- 1. Explain and practice safety measures necessary when working in MRI.
- 2. Identify the major components of MRI equipment.
- 3. Identify various coils and their uses.
- 4. Identify the MRI safety zones.
- 5. Explain the strength of the magnets used in MRI.
- 6. Identify the major differences between MRI and Radiography with regard to equipment, procedures and patient care.
- 7. Explain the importance of an accurate patient history prior to MRI imaging.
- 8. Identify metallic objects which should be removed from patients.
- 9. Describe how an image is obtained and formed in MRI.
- 10. Practice venipuncture skills.
- 11. Describe the types of contrast media used in MRI.
- 12. Distinguish between T1 and T2 weighted images.
- 13. Identify X, Y and Z planes of the patient.
- 14. Identify gross anatomy on an MRI scan.

Nuclear Medicine Rotation Expectations

- 1. Identify the major components of Nuclear Medicine equipment.
- 2. Describe the function of a gamma camera.
- 3. Describe PET imaging and the advantages of PET fusion studies.
- 4. List clinical indications for various Nuclear Medicine studies.
- 5. Describe the hand and body check as it pertains to nuclear medicine
- 6. Explain the purpose and rationale for hot lab procedures.
- 7. Explain use of lead shielding, syringe shielding and latex gloves in nuclear medicine.
- 8. Explain use of radiation detectors in nuclear medicine.
- 9. Explain dose calibration.
- 10. Describe routes of radiopharmaceuticals for specific organs.
- 11. Explain patient/operator safety regarding elimination of isotope from the body.
- 12. Compare and contrast Nuclear Medicine studies with conventional imaging procedures.
- 13. Describe modes of scanning: time, counts, and dynamics.
- 14. Describe forms of immobilization used in nuclear medicine.

Pediatric Rotation Expectations

- 1. Recognize change in patient/technologist interaction based upon patient age.
- 2. Discuss the importance of parent communication in pediatric radiography.
- 3. Identify assorted immobilization devices unique to pediatric imaging.
- 4. Participate in room preparation prior to patient arrival.
- 5. Identify different patient conditions unique to pediatric age groups and recognize procedural changes brought about by conditions.
- 6. Identify methods of radiation protection for patient, parent, and operator.
- 7. Identify equipment and appropriate technical factor unique to pediatric imaging.
- 8. Describe the importance of the Image Gently campaign.
- 9. Observe, assist, and perform general, fluoroscopic, portable, and surgical radiographic procedures.
- 10. Perform mandatory and elective pediatric competencies in accordance with ARRT guidelines.

Radiation Therapy Rotation Expectations

- 1. Identify the major components of Radiation Therapy equipment.
- 2. Observe and assist with set-up of the treatment room.
- 3. Explain the production of radiation in a linear accelerator.
- 4. Differentiate between external beam therapy and brachytherapy.
- 5. Explain the importance of a patient's treatment chart with regard to treatment field size, distance, necessary blocking, and patient positioning.
- 6. Identify common instructions given to a patient prior to treatment.
- 7. Describe the importance of conventional simulation, CT simulation, dosimetry, and the treatment room.
- 8. Identify operator & patient safety devices.
- 9. Describe the various forms of patient immobilization used.
- 10. Describe various ways to alter dose distribution including lead alloy blocks, bolus bags and wedges.
- 11. Describe purpose and use of various positioning methods, including cone down field, arc or rotational field and opposed field.
- 12. Identify shielding materials and the multi leaf collimator.
- 13. Identify threshold doses for specific organs.
- 14. Describe complications that may occur due to radiation therapy treatments.

Ultrasound Rotation Expectations

- 1. Identify the major components of ultrasound equipment.
- 2. Describe the major differences between general x-ray and sonography.
- 3. List anatomical structures commonly imaged with sonography.
- 4. Describe how Ultrasound images are formed.
- 5. Explain the differences between the terms anechoic, hypoechoic and hyperechoic.
- 6. Identify different transducers and indications for their uses.
- 7. Understand the difference between sagittal and transverse planes in sonography.
- 8. Identify cystic and solid masses on Ultrasound images.
- 9. List conditions which justify having an Ultrasound procedure.
- 10. State the advantages of Ultrasound over other types of radiology procedures.

Imaging Procedure Competency Evaluations

Grading Criteria

The student's ability in performing imaging procedure competencies is evaluated according to the following scale: 4 (outstanding) = 100% 3 (above average) = 93% 2 (average) = 85% passing clinical grade 1 (below average) = 75% 0 (highly concerning performance) = 0%

Students must achieve a score of 85% or higher on all competency attempts to meet course and ARRT clinical competency requirements. If a student attempts a competency and receives a score less than 85%, the attempt will be averaged into the clinical course grade but will not count toward course or ARRT requirements.

Forms

Clinical Competency Evaluation Form

Primary competency evaluation form used in the clinical education setting. This form is used for all general radiographic competencies (e.g., chest, abdomen, extremities) and includes procedural assessment, part-IR alignment, positioning, CR-IR alignment, CR-part alignment, exposure factors and image analysis.

This form is utilized in Clinical Education I-VII.

See Appendix E – Clinical Competency Evaluation Criteria

Fluoroscopic Procedure Evaluation Form

This form is specifically used for fluoroscopic competency evaluations. The fluoroscopy procedures evaluated with this form include upper gi series, contrast enema, small bowel series, barium swallow, cystogram/VCUG, ERCP, arthrogram, myelogram and hysterosalpingogram. *This form is utilized in Clinical Education II-VII*.

See Appendix F – Fluoroscopic Procedure Competency Evaluation Criteria

Mobile C-Arm Procedure Competency Evaluation Form

This form is specifically used for c-arm competency evaluations. The mobile c-arm procedures evaluated with this form include the c-arm procedure (requiring manipulation to obtain more than one projection) and the surgical c-arm procedure (requiring manipulation around a sterile field).

This form is utilized in Clinical Education IV-VII. **See Appendix G – Mobile C-Arm Procedure Competency Evaluation Criteria**

Patient Care Competency Evaluations

Grading Criteria

The student's ability in performing patient care activities is evaluated according to the following scale:

4 (outstanding) = 100% 3 (above average) = 93% 2 (average) = 85% passing clinical grade 1 (below average) = 75% 0 (highly concerning performance) = 0%

Students must achieve a score of 85% or higher on all competency attempts to meet course and ARRT clinical competency requirements. If a student attempts a competency and receives a score less than 85%, the attempt will be averaged into the clinical course grade but will not count toward course or ARRT requirements.

<u>Forms</u>

Care of Patient Medical Equipment

During the course of clinical education and performance of radiographic procedures, students are expected to identify and properly care for multiple patient care devices. This form is used to evaluate the student's care of such devices, including, but not limited to, chest drainage tubes, nasogastric tubes, surgical drains, ventilator connections, urinary drainage and intravenous lines. *This form is utilized in Clinical Education I-VII*.

See Appendix H – Care of Patient Medical Equipment Evaluation Criteria

Medical Asepsis

Infection control and safety are an integral part of the student's daily activities. During the course of clinical education and performance of radiographic procedures, students are expected to properly practice medical aseptic technique. This form assesses hand hygiene, donning PPE, doffing PPE and equipment asepsis.

This form is utilized in Clinical Education I-VII. See Appendix I – Medical Asepsis Evaluation Criteria

Patient Transfer (Stretcher)

During the course of clinical education and performance of radiographic procedures, students are expected to safely transfer patients on stretchers. This form evaluates the student's performance when transferring patients from a stretcher to the exam table.

This form is utilized in Clinical Education I-VII.

See Appendix J – Patient Transfer (Stretcher) Evaluation Criteria

Patient Transfer (Wheelchair)

During the course of clinical education and performance of radiographic procedures, students are expected to safely transfer patients in wheelchairs. This form evaluates the student's performance when transferring patients from a wheelchair to the exam table or erect Bucky. *This form is utilized in Clinical Education I-VII.*

See Appendix K – Patient Transfer (Wheelchair) Evaluation Criteria

Surgical Asepsis

Infection control and safety are an integral part of the student's daily activities. During the course of clinical education and performance of radiographic procedures, students are expected to properly practice surgical aseptic technique. This form assesses hand hygiene, donning sterile attire and preparing/maintaining a sterile field.

This form is use in Clinical Education II-VII.

See Appendix L – Surgical Asepsis Evaluation Criteria

Venipuncture

During the course of clinical education and performance of radiographic procedures, students are expected to properly perform venipuncture. This form assesses pre-venipuncture requirements, venipuncture technique and post-venipuncture requirements.

This form is utilized in Clinical Education II-VII.

See Appendix M – Venipuncture Evaluation Criteria

Vital Signs

During the course of clinical education and performance of radiographic procedures, students are expected to properly obtain patient vital signs. This form assesses the performance of obtaining temperature, respiration, blood pressure, pulse and pulse ox.

This form is utilized in Clinical Education I-VII.

See Appendix N – Vital Signs Evaluation Criteria

Additional Clinical Performance Evaluations

Advanced C-Arm Equipment Operation

This form is used to evaluate the student's ability to manipulate and operate surgical radiography equipment at an advanced level just prior to graduation.

This form is utilized in Clinical Education VII.

See Appendix O – Advanced C-Arm Equipment Operation Evaluation Criteria

Basic C-Arm Equipment Operation

This form is used to evaluate the student's ability to properly manipulate and operate surgical radiography equipment at a basic level during the first year of the program.

This form is utilized in Clinical Education III.

See Appendix P – Basic C-Arm Equipment Operation Evaluation Criteria

Image Analysis Case Presentation

This form is used to evaluate the student's ability to complete multiple tasks as part of an image analysis case presentation. Image analysis case presentations are integral components of each clinical course.

This form is utilized in Clinical Education I-VII.

See Appendix Q – Image Analysis Case Presentation Evaluation Criteria

Monthly Evaluation by Clinical Preceptors

This form is completed the Clinical Preceptor(s) on a monthly basis and evaluates the student's overall clinical performance.

This form is utilized in Clinical Education I-VII.

See Appendix R – Monthly Evaluation by Clinical Preceptors Evaluation Criteria

Weekly Evaluation by Clinical Faculty (CE I)

This form is completed the College Clinical Faculty on a weekly basis and evaluates new student performance during the first clinical course.

This form is utilized in Clinical Education I only.

See Appendix S – Weekly Evaluation by Clinical Faculty Evaluation Criteria (CE I)

Weekly Evaluation by Clinical Faculty (CE II-VII)

This form is completed the College Clinical Faculty on a weekly basis and evaluates the student's continual competence.

This form is utilized in Clinical Education II-VII.

See Appendix T – Weekly Evaluation by Clinical Faculty Evaluation Criteria (CE II-VII)

Exit Evaluations

Student Exit Evaluation

The student exit evaluation is completed by College Clinical Faculty during the final semester of the program in conjunction with the Professional Characteristics Evaluation. *This form is utilized in Clinical Education VII.* **See Appendix U – Student Exit Evaluation Criteria**

Professional Characteristics Evaluation

This form evaluates the professional characteristics exhibited by the student in the clinical education setting and is completed by College Clinical Faculty. *This form is utilized in Clinical Education VII.* **See Appendix V – Professional Characteristics Evaluation Criteria**

Faculty/Preceptor Evaluations

Clinical Instruction Performance Evaluation

Performance evaluations shall be completed on all individuals who assist in the clinical competency process and performance evaluation of the Diagnostic Medical Imaging Program students. This includes College Clinical Faculty as well as JRCERT recognized Clinical Preceptors. Students will complete the evaluations each semester. Results will be shared with faculty and preceptors, at minimum, on an annual basis.

This form is utilized in Clinical Education I-VII.

See Appendix W – Clinical Instruction Performance Evaluation Criteria

Clinical Visit Documentation

During clinical affiliate visits, College Clinical Faculty will observe, assist, and evaluate students in the clinical education setting and obtain feedback on student clinical progress. Faculty will also communicate with Clinical Preceptors to ensure program policies and procedures are adhered to and accreditation standards are being met. The purpose of this form is to document observations during these weekly clinical visits.

This form is utilized in Clinical Education I-VII.

See Appendix X – Clinical Visit Documentation Criteria

Community College *of* Philadelphia

DIAGNOSTIC MEDICAL IMAGING PROGRAM

New Student Hospital Orientation Guide

Appendix A

New Student Orientation

New student orientation consists of three mandatory components:

Program orientation (part I) takes place prior to program commencement in June. It includes a comprehensive review of the program policy manual, DMI curriculum, College resources (e.g., Learning Lab, Counseling), uniform fitting and completion of multiple required forms.

Clinical orientation (part II) takes place immediately following the DMI 101 final exam (late August) and consists of a comprehensive review of clinical education expectations and evaluations, including ARRT competency requirements, E*Value use and all clinically related policies and procedures (e.g., supervision, radiation safety, attendance, dress code).

Hospital orientation (part III) takes place the week prior to the first fall semester and Clinical Education I (DMI 196) commencement. Students spend 1 ½ days at their assigned primary clinical affiliate. Orientation at any alternate site will take place on the first day of the rotation with an assigned Clinical Preceptor.

The Purpose of this Document

This document in intended to guide Clinical Preceptors in developing an informative and instructive hospital orientation. Each clinical affiliate has the autonomy to design a series of events that can stimulate an enthusiastic student. Hospital orientation is a time for new students to become acquainted with their clinical surroundings and provides the Clinical Preceptor with a unique opportunity to set the climate and tone for clinical rotations. A major objective is to empower the new students with information they can use to be helpful and productive members of the Radiology department during clinical education. The following checklist shall serve as a guide during hospital orientation. All items should be checked off (or marked N/A where applicable) and both student and Clinical Preceptor should sign completed checklists at the conclusion of orientation.

Note: Prior to hospital orientation, students have fully reviewed all program policies and procedures and signed the program policy manual acknowledgement and agreement form. Students have also completed the DMI 101 course - Introduction to Diagnostic Medical Imaging. This course provides an overall view of diagnostic medical imaging, describing its relationship to radiology and its part in medicine. Communication skills, professional conduct of the radiographer, medico-legal issues and ethical standards are covered as well as infectious diseases, infection control, standard precautions and safety. The basic concepts of radiographic equipment, patient positioning, image production and radiation protection are presented and discussed.

Hospital Orientation Checklist

Institutional Policies and Procedures

- □ Mission statement
- □ Quality patient care policy
- □ TJC National Patient Safety Goals
- □ Patient confidentiality (HIPAA)
- □ Infection control, PPE and sharps handling
- \Box Emergency codes
- $\hfill\square$ Hospital ID badges
- □ Hospital tour

Departmental Policies and Procedures

- Radiation safety (dosimeters, lead aprons; expectations in general, fluoroscopy and mobile rotations)
- □ MRI safety & MRI screening protocol
- □ Fire safety (nearest fire alarms, extinguishers and use)
- □ Hazardous chemicals in Radiology
- □ Student responsibilities in event of fire, hazardous spills, and/or disasters
- □ Student responsibilities in event of CODE/Rapid Response; location of CODE cart
- □ Department procedure protocols
- Use of lead markers
- □ Computer systems (PACS/RIS/HIS; functions and use)
- □ Stat readings and image copies
- □ Incident reporting
- □ Professionalism and dress code expectations
- Attendance expectations (clocking in/out, calling out procedure, lunch breaks)
- □ Important departmental phone numbers
- □ Student lockers; lounge
- Departmental tour & introductions (staff, preceptors, managers and administrators)

Patient Care and Radiographic Procedures

Location of patient care items:

- □ Emesis basins/bags
- □ Bedpans/urinals
- □ Slippers/socks
- □ Gowns
- Blankets
- □ Sheets/pillowcases

Location of medical asepsis items:

- □ Sink/soap, alcohol-based hand rubs
- Gloves
- Clorox/Sani-cloth wipes
- Soiled linen, biohazard waste

Equipment:

- Basic use of stretchers/wheelchairs (e.g., breaks, steering, side rails, footrests)
- □ Exam room preparation and clean-up
- Digital Radiography equipment
- Device Portable Radiography equipment
- □ Mobile C-arm equipment
- Computed Radiography equipment and image processing (where applicable)

Competency eligibility means the student has successfully completed classroom assessment or a Clinical Objective Evaluation (COE) for the respective patient care activity or imaging procedure. Students <u>may not perform clinical competencies in the clinical education setting unless this is verified.</u>

Radiography

1. Introduction

Candidates applying for certification and registration under the primary eligibility pathway are required to meet the Professional Education Requirements specified in the *ARRT Rules and Regulations*. *ARRT's Radiography Didactic and Clinical Competency Requirements* are one component of the Professional Education Requirements.

The requirements are periodically updated based upon a <u>practice analysis</u> which is a systematic process to delineate the job responsibilities typically required of radiographers. The result of this process is a <u>task inventory</u> which is used to develop the clinical competency requirements (see section 4 below) and the content specifications which serve as the foundation for the didactic competency requirements (see section 3 below) and the examination.

2. Documentation of Compliance

Verification of program completion, including Didactic and Clinical Competency Requirements and all degree-related requirements including conferment of the degree, will be completed on the Program Completion Verification Form on the ARRT Educator Website after the student has completed the Application for Certification and Registration.

Candidates who complete their educational program during 2022 or 2023 may use either the 2017 Didactic and Clinical Competency Requirements or the 2022 requirements. Candidates who complete their educational program after December 31, 2023 must use the 2022 requirements.

3. Didactic Competency Requirements

The purpose of the didactic competency requirements is to verify that individuals had the opportunity to develop fundamental knowledge, integrate theory into practice and hone affective and critical thinking skills required to demonstrate professional competence. Candidates must successfully complete coursework addressing the topics listed in the <u>ARRT Content Specifications</u> for the Radiography Examination. These topics would typically be covered in a nationally-recognized curriculum such as the ASRT Radiography Curriculum. Educational programs accredited by a mechanism acceptable to ARRT generally offer education and experience beyond the minimum requirements specified in the content specifications and clinical competency documents.

4. Clinical Competency Requirements

The purpose of the clinical competency requirements is to verify that individuals certified by the ARRT have demonstrated competence performing the clinical activities fundamental to a particular discipline. Competent performance of these fundamental activities, in conjunction with mastery of the cognitive knowledge and skills covered by the certification examination, provides the basis for the acquisition of the full range of procedures typically required in a variety of settings. Demonstration of clinical competence means that the candidate has performed the procedure independently, consistently, and effectively during the course of his or her formal education. The following pages identify the specific procedures for the clinical competency requirements. Candidates may wish to use these pages, or their equivalent, to record completion of the requirements. The pages do NOT need to be sent to the ARRT.

4.1 General Performance Considerations

4.1.1 Patient Diversity

Demonstration of competence should include variations in patient characteristics such as age, gender, and medical condition.

4.1.2 Elements of Competence

Demonstration of clinical competence requires that the program director or the program director's designee has observed the candidate performing the procedure independently, consistently, and effectively during the course of the candidate's formal educational program.

4.1.3 Simulated Performance

ARRT defines simulation of a clinical procedure routinely performed on a patient as the candidate completing all possible hands-on tasks of the procedure on a live human being using the same level of cognitive, psychomotor, and affective skills required for performing the procedure on a patient.

ARRT requires that competencies performed as a simulation must meet the same criteria as competencies demonstrated on patients. For example, the competency must be performed under the direct observation of the program director or program director's designee and be performed independently, consistently, and effectively.

Simulated performance must meet the following criteria:

- Simulation of imaging procedures requires the use of proper radiographic equipment without activating the x-ray beam.
- A total of ten imaging procedures may be simulated. Imaging procedures eligible for simulation are noted within the chart (see section 4.2.2).
- If applicable, the candidate must evaluate related images.
- Some simulations are acceptable for General Patient Care (see section 4.2.1). These do not count toward the ten imaging procedures that can be simulated.

4.2 Radiography-Specific Requirements

As part of the education program, candidates must demonstrate competence in the clinical procedures identified below. These clinical procedures are listed in more detail in the following sections:

- Ten mandatory general patient care procedures;
- 36 mandatory imaging procedures;
- 15 elective imaging procedures selected from a list of 34 procedures;
- One of the 15 elective imaging procedures must be selected from the head section; and
- Two of the 15 elective imaging procedures must be selected from the fluoroscopy studies section.

One patient may be used to document more than one competency. However, each individual procedure may be used for only one competency (e.g., a portable femur can only be used for a portable extremity or a femur but not both).

4.2.1 General Patient Care Procedures

Candidates must be CPR/BLS certified and have demonstrated competence in the remaining nine patient care procedures listed below. The procedures should be performed on patients whenever possible, but simulation is acceptable if state regulations or institutional practice prohibits candidates from performing the procedures on patients.

| General Patient Care Procedures | Date Completed | Competence Verified By |
|--|-------------------|---------------------------|
| CPR/BLS Certified | | |
| Vital Signs – Blood Pressure | | |
| Vital Signs – Temperature | | |
| Vital Signs – Pulse | | |
| Vital Signs – Respiration | | |
| Vital Signs – Pulse Oximetry | | |
| Sterile and Medical Aseptic Technique | | |
| Venipuncture* | | |
| Assisted Patient Transfer (e.g., Slider Board, Mechanical Lift, Gait Belt) | | |
| Care of Patient Medical Equipment (e.g., Oxygen Tank, IV Tubing) | | |

*Venipuncture can be simulated by demonstrating aseptic technique on another person, but then inserting the needle into an artificial forearm or suitable device.

4.2.2 Imaging Procedures

Institutional protocol will determine the positions and projections used for each procedure. When performing imaging procedures, the candidate must independently demonstrate appropriate:

- patient identity verification;
- examination order verification;
- patient assessment;
- room preparation;
- patient management;
- equipment operation;
- technique selection;
- patient positioning;
- radiation safety;
- image processing; and
- image evaluation.

4.2.2 Imaging Procedures (continued)

| Imaging Procedures | Mandatory or Elective | | Eligible | | |
|--|-----------------------|--------------|-------------------|-------------------|---------------------------|
| | Mandatory | Elective | for Simulation | Date Completed | Competence Verified By |

Position Statement on Breast Imaging Clinical Rotations

Adopted by the JRCERT Board of Directors (October 2021)

The JRCERT Board of Directors has received numerous inquiries to update and generalize the language in the Position Statement on Breast Imaging Clinical Rotations.

With regard to breast imaging, the JRCERT has determined programs must make every effort to place students in a breast imaging clinical rotation/procedure if requested and available. However, programs will not be expected to attempt to supersede clinical site policies that restrict breast imaging rotations/ procedures to students. Students should be advised that placement in a breast imaging rotation is not guaranteed.

The JRCERT reiterates that it is the responsibility of each clinical site to address any legal challenges related to a program's inability to place students in a breast imaging rotation. All students should be informed and educated about the various employment opportunities and potential barriers that may affect their ability to work in a particular clinical staff position.

Community College of Philadelphia **Diagnostic Medical Imaging Program** *Clinical Competency Evaluation Criteria*

The student's clinical competency performance will be rated according to the following scale:

| Outstanding | Above | Average | Below | Unacceptable |
|--|---|---|---|---|
| | Average | | Average | |
| 4 | 3 | 2 | 1 | 0 |
| Consistently demonstrates desired outcome/performance: | Generally demonstrates desired performance; improvement continues | Exhibits desired performance as expected: on-going | Rarely exhibits desired performance; considerable | Never exhibits desired performance; serious deficiencies exist that |
| little or no improvement needed | to occur as expected | direction/assistance is necessary; additional effort toward | improvement is needed | need immediate attention |

The likert scale is based on the following Program clinical performance expectations:

- **4 = 100 (Exemplary)**
- 3 = 93 (Proficient)
- 2 = 85 (Competent) *passing clinical grade*
- **1 = 75 (Incompetent)**
- **0** = highly concerning performance

Procedural Assessment Section

Patient Safety & Radiation Protection (these items will be rated once for overall performance)

1. Equipment set-up and asepsis

Students are expected to clean the equipment prior to the exam. New table sheet, pillow case, etc. Appropriate use of alcohol-based products versus bleach. For exams with mobile (portable) units, all ancillary equipment (e.g., tray table, trash can, soiled linen cart) must be removed to facilitate portable unit movement. Portable unit must be set to proper position alongside the bed/stretcher.

2. <u>Hand hygiene</u>

Students are expected to clean their hands prior to the exam and in the presence of the patient. Students are expected to wear gloves. Students are also expected to clean their hands post-exam.

3. Patient identification

Students are expected to appropriately identify patients using a minimum of two identifiers (e.g., first <u>and</u> last name, DOB, MRN) and check the ID bracelet when applicable.

- 4. <u>Patient history/LMP documentation</u> Students are expected to obtain patient history and compare to the exam order. Students are also required to apply the 10-day rule for LMP.
- 5. Patient communication

Students are expected to communicate appropriately with the patient throughout the exam. This includes appropriately addressing the patient (Mr. /Mrs. & patient surname), exam explanation, positioning instructions, breathing instructions and post-exam instructions.

6. <u>Removal of artifacts</u>

Students are expected to confirm the removal of preventable artifacts (e.g. clothing, eyeglasses, jewelry) prior to the start of the procedure. For exams with mobile (portable) units, students are expected to carefully move medical equipment out of the imaging field if possible and approved by nursing staff/physician. Students are also expected to move the equipment back into place after image acquisition.

7. <u>Radiation protection practices</u>

Students are expected apply appropriate radiation practices to patients, selves and others (e.g., shielding, ALARA principle).

Part-IR Alignment (these items will be rated for each projection)

8. Exposure field size

Students are expected to use the appropriate exposure field size for the selected body part. At no time should an exposure field size larger than the size of the IR be used.

- 9. <u>Orientation to anatomy</u> Students are expected to orient the exposure field for the projection (e.g., crosswise/landscape, lengthwise/portrait).
- 10. Centering to IR

Students are expected to center the body part to the image receptor.

Positioning (these items will be rated for each projection)

11. Patient position

Students are expected to properly position the patient for each projection (e.g., seated, erect, recumbent). Students are expected to confirm with the nursing staff/physician that any positional adjustments required for the procedure are possible when applicable.

12. <u>Part position (e.g., rotation, OID)</u> Students are expected to properly position the part (e.g., obliquity, rotation, tilt, and flexion).

13. <u>Immobilization (e.g., instruction, sponges)</u> Students are expected to use appropriate immobilization devices and provide applicable patient instruction prior to exposure.

14. Anatomical markers

Students are expected to use lead anatomical markers for all projections and place them appropriately (e.g., right versus left side, face-up versus face-down).

CR-IR Alignment (these items will be rated for each projection)

15. CR centered to IR

Students are expected to align the central ray to the center of the image receptor.

16. Use of proper SID

Students are expected to set the proper source-to-image receptor distance (e.g., 40" versus 72", table top versus table Bucky measurements).

17. <u>Use of appropriate collimation</u> Students are expected to collimate to the part and ensure inclusion of pertinent anatomy.

CR-Part Alignment (these items will be rated for each projection)

- 18. <u>CR centered to part</u> *Students are expected to align the central ray to the body part (e.g., T7 & MSP for a PA Chest).*
- 19. <u>Accurate CR angle when appropriate</u> Students are expected to ensure a perpendicular beam or implement appropriate CR angle (e.g., 15° cephalic for AP axial sacrum).

Exposure Factors (these items will be rated for each projection)

20. Exposure calculation and control panel settings

Students are expected to utilize technique charts and evaluate patient body habitus when calculating exposure factors (e.g., hypersthenic versus asthenic, pediatric versus adult). Students are expected to set appropriate exposure factors for each projection (e.g., kV, mAs, proper APR/AEC settings). Students are also expected to ensure the table Bucky, table top or erect Bucky is selected.

<u>Image Analysis Section (these items will be rated once for overall performance)</u>

Students are expected to evaluate final images and discuss the factors in each of the following categories. Faculty/Preceptors will score students on their ability to evaluate the images.

Patient Positioning/Equipment Set-Up

21. Identification of projection/position, orientation of image, evaluation of marker placement (pre-exposure versus annotated), identification of positioning errors and evaluation of CR-part-IR alignment

Anatomy & Pathology

22. Identification anatomy best demonstrated/inclusion of pertinent anatomy, identification of obvious pathology, evaluation of additive versus destructive pathology

Radiation Protection

23. Evaluation of appropriate collimation (versus image cropping) and use of shielding

Image Detail, Distortion & Artifacts

24. Evaluation of spatial resolution, identification of size and/or shape distortion, identification of voluntary versus involuntary motion, identification of preventable versus unpreventable image artifacts

Exposure

25. Identification of adequate versus inadequate exposure/beam penetration, evaluation of image contrast, discussion of exposure indicators/changes deemed necessary.

Scoring Summary

1 Projection - 25 Items

- (4) Outstanding = 4 points each = 100 (4 points for each O selected)
- (3) Above Average = 3.72 points each = 93 (-0.28 points for each AA selected)
- (2) Average = 3.40 points each = 85 (-0.60 points for each A selected)
- (1) Below Average = 3 points each = 75 (-1 point for each BA selected)
- (0) Unacceptable = 0 points each = 0 (-4 points for each U selected)

<u>2 Projections – 39 items</u>

- (4) Outstanding = 2.56 points each = 100 (2.56 points for each O selected)
 (3) Above Average = 2.38 points each = 93 (-0.17 points for each AA selected)
 (2) Average = 2.17 points each = 85 (-0.39 points for each A selected)
 (1) Below Average = 1.92 points each = 75 (-0.64 points for each BA selected)
 (0) Unacceptable = 0 points each = 0 (-2.56 points for each U selected)
- <u> 3 Projections 53 items</u>
- (4) Outstanding = 1.88 points each = 100 (1.88 points for each O selected)
- (3) Above Average = 1.75 points each = 93 (-0.13 points for each AA selected)
- (2) Average = 1.60 points each = 85 (-0.28 points for each A selected)
- (1) Below Average = 1.41 points each = 75 (-0.47 points for each BA selected) (0) Unacceptable = 0 points each = 0 (-1.88 points for each U selected)
- (b) Onacceptable = 0 points each = 0 (-1.88 points for each

<u>4 Projections – 67 items</u>

(4) Outstanding = 1.49 points each = 100 (1.49 points for each O selected)
(3) Above Average = 1.38 points each = 93 (-0.11 points for each AA selected)
(2) Average = 1.26 points each = 85 (-0.23 points for each A selected)
(1) Below Average = 1.11 points each = 75 (-0.38 points for each BA selected)
(0) Unacceptable = 0 points each = 0 (-1.49 points for each U selected)

5 Projections – 81 items

(4) Outstanding = 1.23 points each = 100 (1.23 points for each O selected)
(3) Above Average = 1.14 points each = 93 (-0.09 points for each AA selected)
(2) Average = 1.04 points each = 85 (-0.19 points for each A selected)
(1) Below Average = 0.92 points each = 75 (-0.31 points for each BA selected)
(0) Unacceptable = 0 points each = 0 (-1.23 points for each U selected)

A grade reduction of 15 points will occur if 'No' is selected for "Did the student complete this entire procedure competently without any repeatable errors?"

Community College of Philadelphia Diagnostic Medical Imaging Program Patient Care Activity – Clinical Competency Evaluation Care of Patient Medical Equipment Evaluation Criteria

During the course of clinical education and performance of radiographic procedures, students are expected to identify and properly care for multiple patient care devices.

The patient care device(s) that apply to the examination observed shall be selected:

| Non-tunneled catheter (Quinton) |
|---------------------------------------|
| Oxygen tubing & nasal cannula/mask |
| Left Ventricular Assist Device (LVAD) |
| Nephrostomy catheter |
| PEG or PEJ tube |
| PICC line |
| Surgical drain |
| Tunneled catheter (Hickman, Broviac) |
| Urostomy device/drainage |
| Ventilator tubing/connections |
| |

The student's ability to care for the selected patient care equipment is rated according to the following scale:

| 4 – Ou | utstanding | 3 – Above Average | 2 - Average | l – Bel | ow A | verage | 0 – U | Jnacce | ptable | N/A |
|--------|---|--|---|----------------------------------|------|--------|-------|---------------|--------|-----|

- $\mathbf{0} = 0$ points each (-6.67 points for each 0 selected)

Community College of Philadelphia Diagnostic Medical Imaging Program Patient Care Activity – Clinical Competency Evaluation Patient Transfer (Stretcher) Evaluation Criteria

During the course of clinical education and performance of radiographic procedures, students are expected to safely transfer patients on stretchers.

| The st | udent's ability to safely transfer the patient is rated account | rding | g to the f | ollowi | ing scal | e: | |
|--------|---|-------|------------|--------|----------|--------|-----|
| 4 – Ou | itstanding 3 – Above Average 2 – Average 1 – Bel | low A | verage | 0 – 1 | Unacce | ptable | N/A |
| 1. | Moves the stretcher alongside the table, preferably on the patient's strong or less affected side. Places it as close to the table as possible and then secures it by depressing the wheel locks. Ensures the table and stretcher are at an equal height when possible. | 4 | 3 | 2 | 1 | 0 | N/A |
| 2. | If using a moving device, rotates the patient's body away from the table while the moving device is placed to the midpoint of the back. If using a draw sheet, begins by rolling up the draw sheet on both sides of the patient. Ensures that the draw sheet is completely under the patient and straightened before the transfer. | 4 | 3 | 2 | 1 | 0 | N/A |
| 3. | Returns the patient to a supine position and ensures the patient is halfway onto the moving device if utilizing one. Asks patient to cross the arms over the chest to avoid injury or interference during transfer. | 4 | 3 | 2 | 1 | 0 | N/A |
| 4. | Supports the patient's head and upper body from the far side of the radiographic table. Directs a second assistant to support the patient's pelvic girdle from the stretcher side and a third assistant to support the patient's legs from the table side. | 4 | 3 | 2 | 1 | 0 | N/A |
| 5. | Grabs the draw sheet and uses it to slowly move the patient onto the table. Removes the moving device, rotating the patient's body if necessary. | 4 | 3 | 2 | 1 | 0 | N/A |

- **4 = 100 (Outstanding)**
 - 3 = 93 (Above Average)
 - 2 = 85 (Average) *passing clinical grade*
 - 1 = 75 (Below Average)
 - **0** = highly concerning performance

Point Deductions Based on 5 Questions:

- 4 = 20 points each (-0 points for each 4 selected)
- $\mathbf{3} = 18.6$ points each (-1.4 points for each 3 selected)
- $\mathbf{2} = 17$ points each (-3 points for each 2 selected)
- $\mathbf{1} = 15$ points each (-5 points for each 1 selected)
- $\mathbf{0} = 0$ points each (-20 points for each 0 selected)

Community College of Philadelphia Diagnostic Medical Imaging Program Patient Care Activity – Clinical Competency Evaluation Patient Transfer (Wheelchair) Evaluation Criteria

During the course of clinical education and performance of radiographic procedures, students are expected to safely transfer patients in wheelchairs.

| The student's ability to safely transfer the patient is rated according to the following scale: | | | | | | | | | | |
|---|---|-----------|--------|-----|--------|--------|-----|--|--|--|
| 4 – Oı | itstanding 3 – Above Average 2 – Average 1 – Be | low A | verage | 0 – | Unacce | ptable | N/A | | | |
| 1. | Communicates with the patient to ensure they can safely stand. | 4 | 3 | 2 | 1 | 0 | N/A | | | |
| 2. | Positions the wheelchair at a 45° angle to the table or erect Bucky, or parallel to the appropriate location. | 4 | 3 | 2 | 1 | 0 | N/A | | | |
| 3. | Moves the wheelchair footrests out of the way and ensures that the wheelchair is locked. | 4 | 3 | 2 | 1 | 0 | N/A | | | |
| 4. | Instructs the patient to sit on the edge of wheelchair seat. | 4 | 3 | 2 | 1 | 0 | N/A | | | |
| 5. | Instructs the patient to push down on the arms of the chair to assist in rising and then stand up slowly. | 4 | 3 | 2 | 1 | 0 | N/A | | | |
| 6. | Assists the patient to a sitting position on the radiographic table or to a standing position at the erect Bucky. Uses a step stool when necessary. | 4 | 3 | 2 | 1 | 0 | N/A | | | |
| 7. | Guides the patient into a recumbent position on the table or into the proper position at the erect Bucky. | 4 | 3 | 2 | 1 | 0 | N/A | | | |
| 8. | At the conclusion of the exam, ensures the wheelchair is locked and safely assists the patient back into the wheelcha | 4 uir. | 3 | 2 | 1 | 0 | N/A | | | |

Grading Scale: 4 = 100

4 = 100 (Outstanding)

- 3 = 93 (Above Average)
- 2 = 85 (Average) *passing clinical grade*
- 1 = 75 (Below Average)
- **0** = highly concerning performance

Point Deductions Based on 8 Questions:

- 4 = 12.5 points each (-0 points for each 4 selected)
- 3 = 11.625 points each (-0.875 points for each 3 selected)
- $\mathbf{2} = 10.625$ points each (-1.875 points for each 2 selected)
- 1 = 9.375 points each (-3.125 points for each 1 selected)
- $\mathbf{0} = 0$ points each (-12.5 points for each 0 selected)

Community College of Philadelphia Diagnostic Medical Imaging Program Patient Care Activity – Clinical Competency Evaluation Surgical Asepsis Evaluation Criteria

Infection control and safety are an integral part of the student's daily activities. During the course of clinical education and performance of radiographic procedures, students are expected to properly practice surgical aseptic technique.

The student's ability to practice surgical aseptic technique is rated according to the following scale: 4 – Outstanding 3 – Above Average 2 – Average 1 – Below Average 0 – Unacceptable N/A Hand Hygiene & Donning Sterile Gown 1. Removes all jewelry from hands and wrist. 4 3 2 1 0 N/A 3 2 2. Cleans hands according to proper hand hygiene and 4 1 0 N/A CDC recommendations (scrubs hands with soap and water for at least 20 seconds or rubs hands for at least 15 seconds or until dry if using an alcohol-based rub) 3. Puts on lead apron, if applicable. Dons a clean sterile 4 3 2 1 0 N/A gown. Puts one arm in and then the other. Ties gown without contaminating or gains assistance with tying gown. Opening a Sterile Tray 4. Places the sterile package in the center of the surface with 4 3 2 1 0 N/A the top flap of the wrapper set properly. 5. Pinches the first flap on the outside of the wrapper between 4 2 1 3 0 N/A the thumb and index finger reaching around (not over) the package. Pulls the flap open and lays it on the far surface. 6. Uses the right hand to open the right flap and the left hand 4 3 2 1 0 N/A to open the left flap. 7. Grasps the turned-down corner, and pulls down the fourth 4 2 1 3 0 N/A and final flap, being sure not to touch the inner surface of any of the package with an unsterile object. Opening Sterile Items/Adding to Sterile Field Opens items properly by separating wrap 4 3 2 1 0 8 N/A

| 0. | opens nems property of separating map. | • | 0 | - | - | 0 | 1 1/1 |
|----|--|---|---|---|---|---|-------|
| 9. | Inverts package and drops onto field without | 4 | 3 | 2 | 1 | 0 | N/A |
| | contaminating. | | | | | | |

Page 1 of 2

| Donning Sterile Gloves | | | | | | |
|--|---|---|---|---|---|-----|
| 10. Using open technique, picks up the first glove by its inside | 4 | 3 | 2 | 1 | 0 | N/A |
| cuff with one hand. | | | | | | |
| 11. Slides the glove onto the opposite bare hand, leaving the | 4 | 3 | 2 | 1 | 0 | N/A |
| cuff down. | | | | | | |
| 12. With the gloved hand (sterile), picks up the other glove by reaching under the cuff. | 4 | 3 | 2 | 1 | 0 | N/A |
| 13. Pulls the glove onto the hand without touching the inside surface of the glove. | 4 | 3 | 2 | 1 | 0 | N/A |
| 14. Arranges sterile items on tray without contaminating. | 4 | 3 | 2 | 1 | 0 | N/A |
| 15. Properly removes sterile gown and gloves and practices | 4 | 3 | 2 | 1 | 0 | N/A |
| hand hygiene. | | | | | | |

4 = 100 (Outstanding)

- 3 = 93 (Above Average)
- 2 = 85 (Average) *passing clinical grade*
- 1 = 75 (Below Average)
- **0** = highly concerning performance

Point Deductions Based on 15 Questions:

- 4 = 6.67 points each (-0 points for each 4 selected)
- $\mathbf{3} = 6.2$ points each (-0.47 points for each 3 selected)
- 2 = 5.67 points each (-1 point for each 2 selected)
- 1 = 5 points each (-1.67 points for each 1 selected)
- $\mathbf{0} = 0$ points each (-6.67 points for each 0 selected)

APPENDIX L

Community College of Philadelphia Diagnostic Medical Imaging Program Patient Care Activity – Clinical Competency Evaluation Venipuncture Evaluation Criteria

During the course of clinical education and performance of radiographic procedures, students are expected to properly perform venipuncture.

| The 4 – C | the student's ability to perform venipuncture is rated account $3 - Above Average 2 - Average 1 - Be$ | ording elow A | g to the f Average | ollow 0 – | ing scal Unacce | le: ptable | N/A |

- $\mathbf{0} = 0$ points each (-5 points for each 0 selected)

Advanced C-arm Equipment Operation Evaluation Criteria

Satisfactory or Unsatisfactory is checked for each of the following tasks:

| | Satisfactory | Unsatisfactory |
|--|--------------|----------------|
| 1. Demonstrate 30 degree RAO and 30 degree LAO | | |
| 2. Demonstrate cranial and caudal angulations | | |
| 3. Demonstrate how to roadmap from a DSA run: Peak opacify Pause run View subtracted image Roadmap mask Save mask Use mask Exit | | |
| 4. Demonstrate cine setup: Mode Pulse Rate 15 FPS (frames per second) Exit | | |
| 5. Use Ethernet cable to send images to PACS | | |

Grading Scale: Satisfactory = 20 points Unsatisfactory = 0 points 100 possible points (-20 points for each Unsatisfactory)

Basic C-arm Equipment Operation Evaluation Criteria

Satisfactory or Unsatisfactory is checked for each of the following tasks:

| | Satisfactory | Unsatisfactory |
|---|--------------|----------------|
| 1. Connect C-arm to work station. | | |
| 2. Plug power cord into AC outlet and turn units on. | | |
| 3. Indicate exposure devices. | | |
| 4. Collimate image. | | |
| 5. Rotate image. | | |
| 6. Flip image. | | |
| 7. Magnify image. | | |
| 8. Save image. | | |
| 9. Indicate alarm reset button. | | |
| 10. Indicate brightness/contrast controls. | | |
| 11. Negate image. | | |
| 12. Crop image. | | |
| 13. Mark image. | | |
| 14. Write a comment. | | |
| 15. Switch modes if applicable. | | |
| 16. Set unit for new patient. | | |
| 17. Enter patient information. | | |
| Grading Scale: Satisfactory = 5.89 points Unsatisfactory = 0 points 100 possible points (-5.89 points for each U) | | |

Image Analysis Case Presentation Evaluation Criteria

| outcome/performance; | improvement continues | expected; on-going | considerable | deficiencies exist that |
| little or no | to occur as expected | direction/assistance is | improvement is needed | need immediate |
| improvement needed | | necessary; additional | | attention |
| | | effort toward | | |
| | | improvement is needed | | |

Case Presentation

- 1. What is the patient's history?
- 2. Describe the anatomy visualized on the radiographs.
- 3. Explain physiology involved. Example: IVU = urinary system, UPGI = digestive system
- 4. Identify osteology visualized on the radiographs. Example: Lumbar spine and pelvis in lower back study or cranial bones in a skull examination. *Do not* discuss lumbar spine anatomy on a barium enema study.

Special Procedure Techniques (if applicable)

- 1. Discuss clinical indications for the particular study.
- 2. Explain the techniques in doing the particular study. Example: Seldinger technique or spinal puncture.
- 3. What contrast medium is used in the study?
- 4. Discuss patient precautions/contraindications to the study.

Patient Positioning and Image Receptor Alignment

- 1. What is the relationship of the planes/baselines to the image receptor?
- 2. How is the patient positioned with relation to the IR (supine, prone, lateral, oblique)?
- 3. What anatomy is best demonstrated with this particular projection?
- 4. What anatomical landmarks are used when centering or positioning of the patient to the IR?
- 5. Has pathology or trauma compromised routine patient positioning?
- 6. What is the relationship of the CR-part-IR?
- 7. Explain the corrections, in patient positioning or CR alignment, that are necessary to make this an optimal image.

Technical Factors and Image Quality

- 1. Was the exposure indicator within an acceptable range?
- 2. Is the part properly penetrated? How can you tell?
- 3. What type of contrast should be demonstrated on this image? Is the scale of contrast acceptable?
- 4. Does the image display indicators for underexposure or overexposure (e.g. quantum noise or excessive gray scale)?
- 5. Has pathology affected the exposure? Is the pathology additive or destructive?
- 6. Has spatial resolution been compromised by motion?
- 7. Evaluate magnification.
- 8. Evaluate shape distortion (elongation & foreshortening) and causes.
- 9. Evaluate marker placement (placement on IR/table, annotation)
- 10. Identify visible artifacts and causes. Are the artifacts preventable?
- 11. Which technical factors should be adjusted to improve the quality of the image?

Radiation Protection

- 1. Evaluate the use of collimation. Is collimation adequate?
- 2. What type of shielding was used for patient protection? Was it placed appropriately?
- 3. What type of shielding was used for operator protection?

Additional Comments and Questions

Students may and should make additional comments about their case presentations. Students should also be prepared to field questions from classmates concerning the presentation.

| Course | # of Presentations | Presentation Topics |

Monthly Evaluation by Clinical Preceptors Evaluation Criteria

Clinical Preceptors evaluate the student-radiographer as objectively as possible in each of the following categories. Preceptors are asked to keep in mind an inaccurate assessment may give students a false sense of their abilities. Feedback in the form of constructive criticism at the end of this evaluation is appreciated as students strive to improve performance.

Each option is numbered according to the following performance scale: (4) <u>Outstanding</u>, (3) <u>Above Average</u>, (2) <u>Average</u>, or (1) <u>Below Average</u>

SELF CONFIDENCE: student's feeling of assurance and self-confidence

| (4) Confident | (3) Capable | (2) Overconfident; | (1) Lacks confidence |
|---------------|-------------|-------------------------|----------------------|
| | | makes careless mistakes | |

INITIATIVE: student's display of interest and motivation (action) in clinical assignment

| (4) Seeks added | (3) Above average | (2) Average initiative; | (1) Unmotivated |
|-----------------|-------------------|-------------------------|-----------------|
| responsibility | initiative | does assigned work | |

ADAPTABILITY: student's ability to be guided, directed, and instructed in making constructive changes in behavior and ideas.

| (4) Always accepts | (3) Usually accepts | (2) Sometimes accepts | (1) Rarely accepts |
|---------------------------|---------------------------|---------------------------|---------------------------|
| constructive criticism as | constructive criticism as | constructive criticism as | constructive criticism as |
| a means for improvement |

ACCOUNTABILITY TO CLINICAL ASSIGNMENT: student's presence in assigned clinical area

| | | | - |
|----------------------|----------------------|------------------------|--------------------------|
| (4) Always present; | (3) Usually present; | (2) Sometimes present; | (1) Rarely present; does |
| makes good effort to | makes some effort | leaves without notice | not make an effort |
| participate | | | |

JUDGMENT: student's ability to reason, interpret and use discretion in carrying out assignments

| | | | | | 0 0 |
|---------------------------|------------|---------------|-------|--------------------------|----------------------|
| (4) Consistent performer; | (3) Organ | nizes and pla | ans | (2) Sometimes | (1) Rarely organized |
| above average | well in fa | miliar situat | tions | disorganized in planning | |

PERFORMANCE UNDER PRESSURE: student's ability to handle pressure and remain calm in busy or crisis situations

| (4) Handles difficult | (3) Focuses well; | (2) Needs guidance to | (1) Loses control if |
|---------------------------|-----------------------|------------------------|----------------------|
| situations skillfully and | completes work | focus and work through | stressed |
| without assistance | accurately but slowly | problems | |
| | | | |

PERSONAL APPEARANCE: student's personal attire/appearance conforms to established dress code at all times

| (4) Always meets dress | (3) Meets dress code; | (2) Meets dress code; | (1) Rarely meets dress |
|------------------------|-----------------------|-----------------------|---------------------------|
| code; well groomed | occasional reminder | careless at times | code; personal hygiene is |
| | required | | a concern |

Page 1 of 3

APPENDIX R

ATTENDANCE/PUNCTUALITY: student arrives at clinical assignment at appointed time in the morning, from lunch and from approved breaks in accordance with College policy

| (4) Punctual; always | (3) Consistently | (2) Occasionally | (1) Frequently late or |
|-----------------------|-----------------------|-------------------------|------------------------|
| looks for work and is | available in assigned | disappears when work is | absent when work is to |
| eager to perform | areas when work is | to be performed | be performed |
| | allocated | | |

INTERPERSONAL RELATIONS: student exhibits professional characteristics when interacting with patients and clinical staff

| (4) Always professional | (3) Usually professional and polite | (2) Uses inappropriate | (1) Often rude; |
|-------------------------|-------------------------------------|-------------------------|-----------------|
| and polite | | verbal or body language | unprofessional |
| - | - | | - |

EMPATHY TO PATIENTS: student demonstrates understanding of feelings, thoughts, and motives of the patient based upon their gender and cultural needs

| (4) Always demonstrates | (3) Usually demonstrates | (2) Indifferent to patient | (1) Does not show |
|-------------------------|--------------------------|----------------------------|---------------------|
| concern | concern | needs | concern for patient |
| | | | |

QUALITY OF PROCEDURE PERFORMANCE: student's accuracy and thoroughness noted in procedure performance

| (4) Consistently accurate | (3) Seldom makes errors; | (2) Sometimes inaccurate | (1) Frequently makes the |
|---------------------------|--------------------------|--------------------------|--------------------------|
| | work is generally | | same mistakes |
| | accurate | | |

PROCEDURE MANAGEMENT: student's ability to independently complete all aspects of procedure using department standards and policies

| (4) Consistently | (3) Usually completes | (2) Slow to learn | (1) Frequently fails to |
|---------------------|-----------------------|---------------------|-------------------------|
| completes procedure | procedure | department protocol | complete procedures |

POSITIONING SKILLS: student's ability to place patient in correct position(s) for required studies

| (4) Always follows | (3) Usually follows | (2) Positions sometimes; | (1) Rarely participates |
|---------------------------|---------------------------|--------------------------|-------------------------|
| protocol without error or | protocol; some assistance | often needs assistance | |
| assistance; rarely needs | needed | | |
| assistance | | | |

KNOWLEDGE/HANDLING OF EQUIPMENT: student's ability to operate the radiographic equipment used in this rotation and to adapt to any changes necessary

| (4) Excellent knowledge | (3) Good knowledge and | (2) Demonstrates | (1) Limited knowledge |
|----------------------------|------------------------|------------------------|-----------------------|
| of equipment in all | can adapt to new | knowledge of equipment | of equipment handling |
| rooms | equipment | when performing in | and operation |
| | | identical or similar | - |
| | | circumstances | |

Page 2 of 3

APPENDIX R

EXPOSURE CONSIDERATIONS/MANIPULATION: student's ability to determine proper technical factors and to change factors as needed in producing a satisfactory radiograph

| (4) Manipulates exposure | (3) Manipulates exposure | (2) Demonstrates some | (1) Unable to make |
|--------------------------|--------------------------|-----------------------|-----------------------|
| factors without | with minimal input from | knowledge but unsure; | exposure adjustments; |
| assistance according to | technologist | makes occasional | needs assistance |
| situation | | mistakes | |

IMAGE EVALUATION: student's ability to identify pertinent anatomy on radiographs; discuss patient position and projection, evaluate image qualities (receptor exposure, contrast, spatial resolution, distortion), and patient protection

| / | <u> </u> | | |
|--------------------------|--------------------------|-----------------------|---------------------------|
| (4) Able to evaluate and | (3) Is able to recognize | (2) Can evaluate some | (1) Incapable of |
| adjust factors in all | and correct mistakes in | image qualities with | identifying any aspect of |
| situations | most cases | assistance | the image; offers |
| | | | minimal evidence of |
| | | | knowledge |

OVERALL PROGRESS: student's ability to learn, retain direction and function during the month

| | | | 0 |
|---------------|----------|-----------|----------|
| (4) Excellent | (3) Good | (2) Fair | (1) Poor |
| (+) LACCHEIR | (3) 0000 | (2) I all | (1)1001 |
| | | | |
| | | | |

QUANTITY OF WORK: student's availability, willingness and general ability to perform procedures

| (4) Top performer | (3) Above average. | (2) Completes expected | (1) Needs prodding. |
|-------------------|--------------------|------------------------|---------------------|
| | Speed and accuracy | work | Low producer |
| | improving | | |

COMMUNICATION SKILLS: student's ability to communicate with members of the medical imaging team and patients

| (4) Always | (3) Usually | (2) Communicates with | (1) Lacks confidence in |
|-----------------------|--------------|-----------------------|-------------------------|
| communicates | communicates | some hesitation | communication with |
| effectively; projects | effectively | | patients and staff |
| confidence | | | |

RADIATION PROTECTION PRACTICES: student's ability to practice appropriate radiation protection with respect to self, patient, and others (e.g., obtaining LMP, use of lead shielding, proper collimation)

| (4) Always follows | (3) Usually follows | (2) Sometimes follows | (1) Rarely follows proper |
|-------------------------|-------------------------|-------------------------|---------------------------|
| proper radiation safety | proper radiation safety | proper radiation safety | radiation safety |
| procedures | procedures | procedures | procedures |
| | | | |

The following additional questions are also answered:

1. Were repeat images required by the student during this rotation?

2. If yes, was the student directly supervised during the repeat exposures? Y

Monthly Evaluation Scoring (20 total items):

- (4) Outstanding = 5 points each = 100
- (3) Above Average = 4.65 points each = 93 (-0.35 points for each 3 selected)
- (2) Average = 4.25 points each = 85 (-0.75 points for each 2 selected)
- (1) Below Average = 3.75 points each = 75 (-1.25 points for each 1 selected)

Community College of Philadelphia **Diagnostic Medical Imaging Program** Student Exit Evaluation Criteria

College Faculty should evaluate the student in the areas noted based on observations of the student in the clinical affiliate. This evaluation should be completed during the final weeks of Clinical Education VII (DMI 299) and in the presence of the student. Faculty are encouraged to provide constructive criticism while obtaining the student's comments.

College Faculty Section **ETHICAL CONDUCT, ATTITUDE, AND PROFESSIONALISM**

The student:

| 1. | can follow instructions | yes | no |
|----|--|-----|----|
| 2. | accepts responsibility | yes | no |
| 3. | adheres to CCP and clinical affiliate policies | yes | no |
| 4. | cooperates with staff and peers | yes | no |
| 5. | demonstrates empathy towards patients | yes | no |
| 6. | accepts constructive criticism | yes | no |
| 7. | demonstrates profession behavior in all situations | yes | no |

COMMENTS:

PSYCHOMOTOR ABILITIES

| The sti | udent: | |
|---------|----------|---------|
| 8 | produces | quality |

| 8. | produces quality radiographs most of the time | yes | no |
|-----|--|-----|----|
| 9. | properly positions and protects the patient | yes | no |
| 10. | handles R/F equipment knowledgeably | yes | no |
| 11. | adjusts technical factors when circumstances require | yes | no |
| 12. | recognizes technical/positioning errors and corrects | yes | no |
| | them accordingly | | |

COMMENTS:

13. IN YOUR OPINION, WHAT ARE THE STUDENT'S STRENGTHS OR STRONG POINTS?

14. IN YOUR OPINION, WHAT ARE THE STUDENT'S WEAKNESSES/AREAS IN **NEED OF IMPROVEMENT?**

Continued

15. IN YOUR OPINION, WHAT ARE THE STUDENT'S EMPLOYMENT PROSPECTS? WHAT TYPE OF FACILITY WOULD THIS STUDENT BE MOST SUCCESSFUL WORKING IN?

Student Section

Faculty shall ask the student the following questions and record responses.

1. WHAT 3 ASPECTS WERE THE MOST POSITIVE ABOUT YOUR TRAINING? (Academic and/or Clinical)

1.

2.

3.

2. WHAT 3 RECOMMENDATIONS WOULD YOU MAKE TO IMPROVE THE DMI PROGRAM EDUCATIONAL EXPERIENCE? (Academic and/or Clinical) 1.

2.

3.

3. WOULD YOU CONSIDER WORKING AT YOUR PRIMARY CLINICAL SITE? WHY OR WHY NOT?

4. ARE YOU SATISFIED WITH THE EDUCATION YOU RECEIVED FROM CCP'S DMI PROGRAM? WHY OR WHY NOT?
Community College of Philadelphia **Diagnostic Medical Imaging Program Professional Characteristics Evaluation Criteria**

Professionalism encompasses a number of different attributes, such as emotions, interests, beliefs, values, and attitudes of the student. Together, these attributes identify and define a professional. Evaluating professional characteristics in the clinical setting is essential and includes concepts such as caring about patients, cooperativeness with staff, confidence, resourcefulness and dependability. College Faculty should evaluate the student in the areas noted based on observations in the clinical setting and also provide constructive criticism regarding professional characteristics.

The student's professional characteristics are rated according to the following performance scale:

| Outstanding | Above | Average | Below | Unacceptable | |
|----------------------|------------------------|-------------------------|-------------------------|-------------------------|--|
| | Average | | Average | | |
| 4 | 3 | 2 | 1 | 0 | |
| Consistently | Generally demonstrates | Exhibits desired | Rarely exhibits desired | Never exhibits desired | |
| demonstrates desired | desired performance; | performance as | performance; | performance; serious | |
| outcome/performance; | improvement continues | expected; on-going | considerable | deficiencies exist that | |
| little or no | to occur as expected | direction/assistance is | improvement is needed | need immediate | |
| improvement needed | | necessary; additional | | attention | |
| | | effort toward | | | |
| | | improvement is needed | | | |

RESPONSIBILITY/DEPENDABILITY

1. Assumes appropriate responsibility and initiative in performing exams. Performs tasks and procedures without being asked. Accepts assigned tasks willingly. 4

3 2 1 0

- 2. Works consistently well. Sees tasks to completion while being accurate and thorough. 4 3 2 1 0
- 3. Demonstrates an interest in and desire for learning. Makes proper use of downtime by asking questions, practicing procedures and equipment manipulation, or familiarizing oneself with the clinical education setting protocols and procedures. 3 1 4 2 0
- 4. Recognizes problems and takes immediate steps to correct. Consults staff when appropriate. 4 3 2 1 0
- 5. Arrives in department on time, ready to begin performing exams and/or preparing room. 4 3 2 1 0
- 6. Always in assigned area. Adheres to scheduled clinical hours and attendance policy. 3 2 1 4 0

PROFESSIONAL DEMEANOR

- 1. Adheres precisely to dress code. Presents a professional appearance.
 - 4 3 2 1 0
- Treats patient information and results of procedures done as confidential information. Provides privacy and comfort to patients.
 4 3 2 1 0
- Provides physical and psychological care for the patient. Recognizes and obtains help for difficult situations.
 4 3 2 1 0
- 4. Practices good radiation protection with respect to patients, self, and co-workers by utilizing collimation, obtaining and documenting LMP, setting appropriate technical factors, properly wearing radiation monitor and utilizing lead shielding when appropriate.
 4 3 2 1 0
- Works effectively as a team member. Communicates well with clinical staff.
 4 3 2 1 0
- 6. Contributes to the efficiency of the radiography department. Presents confidence in skills and knowledge.
 4 3 2 1 0
- 7. Adheres to program, department, and hospital rules and regulations.
 4 3 2 1 0
- 8. Communicates in a professional manner with patients. Puts patients at ease and inspires confidence.
 - 4 3 2 1 0
- 9. Holds self to high standards professionally. Takes pride in quality performance. 4 3 2 1 0

PERSONAL CHARACTERISTICS

- 1. Accepts directions willingly. Follows through on directions given. 4 3 2 1 0
- Accepts constructive criticism in a positive manner. Is receptive to new ideas as helpful for improvement.
 4 3 2 1 0
- 3. Demonstrates accountability for actions. Uses mistakes constructively. Rarely repeats mistakes.
 - 4 3 2 1 0
- 4. Recognizes limitations of skills and knowledge; seeks assistance when necessary.
 4 3 2 1 0
- Participates in challenging procedures. Strives toward proficiency.
 4 3 2 1 0
- 6. Is able to adapt to situational changes with minimal disruptions. Maintains poise in difficult situations.
 - 4 3 2 1 0
- 7. Preserves appearance of calm when events or people are difficult. **4 3 2 1 0**
- 8. Holds self to high personal standards. Recognizes boundaries for inappropriate behaviors, actions, and attitudes.
 - 4 3 2 1 0
- 9. Shows appreciation and support for clinical staff and fellow classmates. Respects and acknowledges talents of peers.
 - 4 3 2 1 0
- Grading Scale: 4 = 100 (Outstanding) 3 = 93 (Above Average) 2 = 85 (Average) passing clinical grade 1 = 75 (Below Average) 0 = highly concerning performance

Point Deductions Based on 24 Questions:

- 4 = 4.167 points each (-0 points for each 4 selected)
- 3 = 3.875 points each (-0.292 points for each 3 selected)
- $\mathbf{2} = 3.54$ points each (-0.625 point for each 2 selected)
- $\mathbf{1} = 3.125$ points each (-1.042 points for each 1 selected)
- $\mathbf{0} = 0$ points each (-4.167 points for each 0 selected)

Community College of Philadelphia **Diagnostic Medical Imaging Program** *Clinical Instruction Performance Evaluation Criteria*

Performance evaluations shall be completed on all individuals who assist in the clinical competency process and performance evaluation of the Diagnostic Medical Imaging Program students. This includes CCP Clinical Faculty as well as JRCERT recognized Clinical Preceptors.

The individual's instructional abilities are rated according to the scale below.

| | | Always | Usually | Sometimes | Rarely | Never | N/A |
|----|--|--------|---------|-----------|--------|-------|----------|
| | | (5) | (4) | (3) | (2) | (1) | |
| 1. | Promotes an atmosphere that is | | | | | | |
| | conducive to learning. | | | | | | |
| 2. | Makes expectations regarding | | | | | | |
| | clinical education clear. | | | | | | |
| 3. | Corrects student mistakes while | | | | | | |
| | encouraging improved | | | | | | |
| | performance. | | | | | | |
| 4. | Communicates with students in a | | | | | | |
| | manner that demonstrates respect. | | | | | | |
| 5. | Affords students adequate | | | | | | |
| | opportunity for communication. | | | | | | |
| 6. | Professionally communicates in the | | | | | | |
| | patient's presence when procedural | | | | | | |
| | direction is required. | | | | | | |
| 7. | Is patient and considerate. | | | | | | |
| 8. | Asks effective questions to | | | | | | |
| | stimulate problem solving and critical thinking. | | | | | | |
| 9. | Allows participation in procedures | | | | | | |
| | within Program direct/indirect | | | | | | |
| | Continued | | | | | | <u> </u> |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |

| | Always | Usually | Sometimes | Rarely | Never | N/A |
|---|--------|---------|-----------|--------|-------|-----|
| | (5) | (4) | (3) | (2) | (1) | |
| 10. Provides constructive criticism as a means for improvement. | | | | | | |
| 11. Is respectful and approachable. | | | | | | |
| 12. Treats students in a fair and professional manner. | | | | | | |
| 13. Shows concern for student progress. | | | | | | |
| 14. Allows further independence as clinical skills are mastered. | | | | | | |
| 15. Connects theory taught in the classroom to Clinical Education. | | | | | | |
| 16. Embodies knowledge, competence, and professionalism expected of a medical imaging professional. | | | | | | |

The evaluator is asked to provide constructive criticism regarding strengths and weaknesses and give examples.

17. Clinical Instruction Strengths:

18. Clinical Instruction Weaknesses/Areas in Need of Improvement:

Community College of Philadelphia Diagnostic Medical Imaging Program *Clinical Visit Documentation Criteria*

During clinical affiliate visits, DMI Program Faculty will observe, assist, and evaluate students in the clinical education setting and obtain feedback on student clinical progress. DMI Program Faculty will also communicate with Clinical Preceptors to ensure program policies and procedures are adhered to and accreditation standards are being met. The purpose of this form is to document observations during these weekly clinical visits.

| During the clinical affiliate visit, DMI Program Faculty witnessed students: | Yes | No | | |
|--|-----|----|--|--|
| in their assigned clinical rotations. | | | | |
| in proper dress code, including ID badge & radiation monitor. | | | | |
| engaging in professional behavior. | | | | |
| taking an active interest in the clinical rotation. | | | | |
| performing procedures & evaluating images appropriately. | | | | |
| practicing radiation safety. | | | | |
| communicating with patients and staff in a professional manner. | | | | |
| During the clinical affiliate visit, DMI Program Faculty witnessed: | | | | |
| student to technologist/equipment ratio of 1:1 (1 student to 1 technologist to 1 | | | | |
| radiographic and/or fluoroscopic imaging room/mobile unit at all times). | | | | |
| support of student learning by Clinical Preceptors. | | | | |
| students having appropriate direct supervision when not deemed competent. | | | | |
| students having appropriate direct supervision when repeating images. | | | | |
| students having appropriate indirect supervision when deemed competent. | | | | |
| During the clinical affiliate visit, DMI Program Faculty provided | | | | |
| constructive criticism to students. | | | | |

Faculty are asked to provide comments regarding the clinical affiliate visit:
